FOREWORD

The Reserve Bank's annual 'Handbook of Statistics on the Indian Economy' provides comprehensive database of macroeconomic and financial variables pertaining to national income, output, prices, money, banking, financial markets, public finance, foreign trade, balance of payments and select socio-economic indicators at varying frequencies since 1998. For a quarter century now, the publication is eagerly looked forward to by researchers, analysts and students.

2. The near real-time version of the Handbook is maintained on the Reserve Bank's 'Database on Indian Economy (DBIE)' portal (<https://dbie.rbi.org.in>) since 2009 for disseminating updated time series data. Over the years, it has undergone presentational improvements, including format changes for some tables, introduction of new tables, discontinuation of some of the tables, and modifications to the existing tables.
3. This Handbook for the year 2022-23, which is 25th in the series, contains 240 statistical tables, covering time series on a wide range of variables/indicators. Its electronic version is being released on the Reserve Bank's revamped DBIE portal as a part of its next generation Data Warehouse, *viz.*, 'Centralised Information Management System (CIMS)'. which was launched by Shri Shaktikanta Das, Governor during the 17th Annual Statistics Day Conference held on June 30, 2023.
4. All Departments in the Bank, which generate macro-financial statistics, have been contributing to the Handbook, including its real-time version, regularly. This publication has been collated by a team in the Data Management and Dissemination Division (DMDD) in the Department of Statistics and Information Management (DSIM) under the overall guidance of Dr.A.R.Joshi, Principal Adviser and Shri Hemant Kumar, Adviser. Notes : 1. - : Indicates no change.

2. Cash reserve ratio is as prescribed under Section 42(1) of the RBI Act, 1934. Statutory Liquidity Ratio is as prescribed under Section 24 of the Banking Regulation Act, 1949.

3. The Liquidity Adjustment Facility (LAF) system was operating on 'auction-based variable rate' during the period from April 27, 2001 to March 28, 2004, and moved to 'fixed rate' mode from March 29, 2004.

4. Till October 28, 2004, nomenclature of repo indicated absorption of liquidity and reverse repo meant injection of liquidity by the Reserve Bank. However, with effect from October 29, 2004 nomenclature of repo and reverse repo has been interchanged as per international usage. The current nomenclature is followed in this Table.

5. Since May 3, 2011 the repo rate is the single independently varying policy rate. The reverse repo rate is linked to the repo rate and was pegged at a 100 basis points below the repo rate. The peg was brought down to 50 basis points w.e.f. April 5, 2016. since April 6,2017 the rate is pegged at a 25 basis points below the repo rate. Since March 27, 2020 the reverse repo rate was adjusted to 40 basis points below the repo rate and w.e.f April 17, 2020, it is pegged to a 65 basis points below the repo rate.

6. Standing Deposit Facility (SDF) was introduced on April 08, 2022 at 3.75 per cent. The SDF rate is placed at 25 basis points below the policy repo rate and has replaced the fixed reverse repo rate as the floor of the LAF corridor since April 8, 2022.

7. The Marginal Standing Facility (MSF) was introduced from the fortnight beginning May 7, 2011. Under the MSF, scheduled commercial banks could borrow overnight up to one per cent of their respective NDTL below the prescribed SLR, at a rate determined with a spread of 100 basis points above the repo rate. The borrowing limit was raised to up to two per cent below the prescribed SLR on April 17, 2012. This limit was temporarily increased to three per cent on March 27, 2020 for a period up to June 30, 2020 and subsequently extended up to September 30, 2020. The increased limit was further extended till September 30, 2021 on February 05, 2021 and then to December 31, 2021 on August 06, 2021. The spread of the MSF above the repo rate was increased to 300 basis points on July 15, 2013. The spread was narrowed to 200 basis points on September 20, 2013 and further to 150 basis points on October 7, 2013 before being restored to 100 basis points on October 29, 2013. The spread was reduced further to 50 basis points on April 5, 2016. The present spread w.e.f. April 6, 2017 is 25 basis points above the repo rate.

(2) With effect from January 2019, sectoral credit data are based on revised format due to which values of some of the existing components published earlier have undergone changes.

Tables 15 & 16

Base: The index numbers of agricultural production are computed on the basis of weights. The weight of a commodity for the production index is taken as the average production of the commodity in the base year, multiplied by the national average price of the commodity during the base year as obtained from the National Accounts Statistics. The average of triennium is taken to fix the base production by eliminating the cyclical fluctuations and evaluate the production with the same price for all States in view of wide variations observed in State prices.

The Index numbers of agricultural production covers 46 crops under two main groups and eight sub-groups.

Tables 15, 21 & 22

Yield: The average production per hectare of any crop/class of crops attained in any given area (such as State) in a year/ cropping season. This is usually given in kilograms per hectare as the unit.

Table 16

The eleven oilseeds comprise groundnut, castorseed, sesamum, nigerseed, rapeseed and mustard, linseed, safflower, sunflower, soyabean, cottonseed and coconut.

Tables 17 & 18

For details on crops and groups, please see Area and Production of Principal Crops in India and Agricultural Statistics at a Glance, Ministry of Agriculture and Farmers Welfare, Government of India.

Tables 18, 20, 22 & 23

The oilseeds comprise groundnut, castorseed, sesamum, nigerseed, rapeseed and mustard, linseed, safflower, sunflower and soyabean.

Table 24

High yielding varieties of seeds: The varieties of seeds have been developed scientifically with the help of genetic engineering over a period of time for most of the cereals and other crops. These have higher resistance to pests, diseases and moisture stress. The cultivation of these seeds is usually associated with higher levels of inputs such as chemical fertilisers and pesticides.

Public Distribution System (PDS): Under this scheme, various important items of consumption are distributed to ration card holders at subsidised rates. The commodities that are distributed under PDS include inter alia, rice, wheat, sugar, edible oil and kerosene oil. The PDS is perceived as an essential component of India's food security policy. A new scheme was implemented, with effect from June 1, 1992, under Revamped Public Distribution System (RPDS) in order to improve PDS's reach to the consumers living in areas of relative economic disadvantage. Subsequently, in 1997, the Government of India decided to convert the universal PDS into a targeted PDS(TPDS) and dual issue pricing was introduced for rice and wheat for households above and below the poverty line level (APL and BPL). Further, National Food Security Act (NFSA) 2013, legally entitled Antyodaya Anna Yojana (AAY) and priority households (PHH) to receive highly subsidized foodgrains under Targeted Public Distribution System. In addition to benefits under NFSA, the Government started one more scheme named as Pradhan Mantri Pradhan Mantri Garib Kalyan Anna Yojana (PMGKAY) which provisioned extra free foodgrains to NFSA beneficiaries in the wake of Covid 19 pandemic from April 2020-December 2022. However, the programme lasted till December 2022 and since January 01, 2023, the government renamed TPDS under NFSA act as PMGKAY through which the distribution of subsidized foodgrains was made completely free.

Procurement: The act of purchasing foodgrains [by Central and state Government agencies as well as the Food Corporation of India (FCI)] from farmers at Minimum Support Price (MSP) so as to provide remunerative prices to farmers as also for distributing under various schemes of the Government, including TPDS, etc.

Minimum Support Price (MSP): The remunerative price at which the Government assures to purchase foodgrains from farmers. The MSPs are declared before each procurement season (Kharif

marketing season for rice covering the period October to September, and Rabi marketing season for wheat covering the period April to March, and are generally based on the recommendations of the Commission for Agricultural Costs and Prices.

Off-take: The quantity of foodgrains sold and distributed under various schemes of the Government including TPDS, open market sales and other welfare schemes.

Open Market Sale (OMS): The sale of foodgrains by FCI to private traders and millers for exports as well as domestic consumption.

Other Welfare Schemes (OWS): Various Central Government schemes other than TPDS, under which foodgrains are distributed either freely or at subsidised rates. Various schemes covered under OWS include Antyodaya Anna Yojana, Food for Work Programme, Nutrition Programme, Relief Work, Flood Relief, Mid-Day Meal, etc.

Stocks: The Stocks of foodgrains that are available with the public sector agencies including FCI, Central Warehousing Corporation and State Warehousing Corporations.

With a view to ensuring stability in the monthly series of Index of Industrial Production (IIP) and remove the effect of change of deflators from the growth rates, the whole series of 2-digit level as well as use-based indices from April-1994 to May-2000 have been revised in July-2000 consequent to the shift in the base of the Wholesale Price Index (WPI) series from 1993-94 to 2004-05. On account of the above one-time revision, the growth rates under certain industry groups/use-based categories have undergone some changes. As most of the new deflators have been used in Industry Group 38, i.e., 'Other Manufacturing Industries', the effect of onetime revision in the indices in this industry group is more prominent.

Another revision of IIP was made in January-2001 for the entire period April-1998 to November-2000 due to several reasons, such as: (i) the need for exclusion from the IIP commodity basket, few items, such as radio receivers, photo sensitised paper, chassis for heavy commercial vehicle (HCV) and engines, as they are highly prone to month to month variations, and (ii) availability of revised data on monthly indices of 'mining sector' from the Indian Bureau of Mines (IBM), Nagpur, for the period April-1994 onwards. The IBM had revised the index by incorporating the data on production of natural gas by private sector and joint venture companies and the internal utilisation part of the output of natural gas by public sector.

Monthly data updated for post pandemic months (April to September 2020), may not be comparable with the IIP of months preceding the COVID-19 pandemic as preventive measures and announcement of nationwide lockdown by the government to contain the spread of COVID-19, resulted in majority of

the industrial sector establishments not operating from the end of March-2020 onwards and reporting nil production in the following months.

Definitions of parameters of Total Inputs, Value of Output, Net value added, Rent paid, Net income, Net fixed capital formation, Gross fixed capital formation, Gross capital formation, and Profits, were modified in ASI 2018-19 in order to make the ASI estimates more consistent with the definitions used in SNA 2008. These changes include change in definition and calculation of Output, Input, Gross and Net Value Added, Rent paid, Rent Received, Net Fixed Capital Formation (NFCF), Gross Fixed Capital Formation (GFCF), Gross Capital Formation (GCF), Net Income and Net Profit. The changes have been effected in the provisional results of ASI 2018-19 and the published figures of earlier years have not been revised. For details please see ASI Write-up 2018-19.

Tables 34, 117 to 129, 192 to 195.

The above tables relating to India's foreign trade are based on the data from the Directorate General of Commercial Intelligence and Statistics (DGCI&S), Ministry of Commerce, Government of India. Some of the important aspects of coverage and composition of the data presented in these tables are briefly given below; for details, reference may be made to the DGCI&S publications, namely: (i) Monthly Statistics of the Foreign Trade of India, Volume I and II, and (ii) Foreign Trade Statistics of India (Principal Commodities and Countries).

Foreign trade data relate to merchandise trade through all the recognised seaports, airports, land custom stations and inland containers depots, export processing zones, foreign post offices, etc. located all over India. Data on exports, which include re-exports, relate to free on board (f.o.b.) values and imports relate to cost, insurance and freight (c.i.f.) values. Exports and imports are based on the general system of recording, according to which exports relate to Indian merchandise and re-exports relate to foreign merchandise previously imported into India. Imports relate to foreign merchandise, whether intended for home consumption, bonding or re-exportation.

Indian Trade Classification, Revision-2 (ITC-Rev. 2) which was based on Standard International Trade Classification Revision-2 (SITC-Rev. 2), was in vogue from April-1977 to March-1987. A new system of commodity classification known as Indian Trade Classification (based on Harmonized Commodity Description and Coding System), in short ITC (HS) has been adopted from April-1987. The ITC (HS) is an extended version of the International Classification System called "Harmonized Commodity Description and Coding System" evolved by World Customs Organization previously known as Customs Co-operation Council, Brussels. Due to changes in trade classification of the commodities, as indicated above, time series data on exports and imports relating to certain commodity groups may not be strictly comparable. Moreover, some country and/ or group definitions have also changed over time. Some of these are stated below:

Data for Russia prior to 1993-94 relate to erstwhile USSR with the exception of 1992-93, wherein the data relate to the Commonwealth of Independent States (C.I.S.) representing a group of following fifteen countries, viz., Armenia, Azerbaijan, Belarus, Estonia, Georgia, Kazakhstan, Kyrgyz Republic, Latvia, Lithuania, Moldova, Russia, Tajikistan, Turkmenistan, Ukraine and Uzbekistan.

From the year 2008-09, data in respect of European Union (E.U.) group consist of twenty-eight countries, *viz.*, Austria, Belgium, Bulgaria, Croatia, Cyprus, Czechoslovakia Rep, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Poland, Portugal, Romania, Slovak Rep, Slovenia, Spain, Sweden and U. K. From 1995-96 to 2007-08, data reported under E.U. relate to fifteen countries and prior to 1995-96, relate to twelve countries. Following Brexit, data for E.U excludes UK from 2020-21 onwards.

Current 13 members of the OPEC are Algeria, Angola, Congo, Equatorial Guinea, Gabon, Iran, Iraq, Kuwait, Libya, Nigeria, Saudi Arabia, the United Arab Emirates and Venezuela.

Trade balance and its components have been defined as:

- (i) Trade balance = Total exports – Total imports.
- (ii) Oil trade balance = Oil exports – Oil imports.
- (iii) Non-oil trade balance = Non-oil exports - Non-oil imports.

Tables 37, 164, 230 & 237

The base year of WPI was revised from 2004-05=100 to 2011-12=100 by the Office of the Economic Adviser (OEA), Ministry of Commerce & Industry. WPI comprise of three major groups, *viz.*, Primary Articles, Fuel & Power and Manufactured Products having weights of 22.62 per cent, 13.15 per cent and 64.23 per cent, respectively. In case of Table 230, annual variation for all indices are calculated from their respective annual average indices.

Tables 38, 165, 231 & 238

The National Statistical Office (NSO), Ministry of Statistics and Programme Implementation (MoSPI) revised the base year of the Consumer Price Index (for rural, urban and combined) from 2010=100 to 2012=100. In case of Table 231, annual variation for all indices are calculated from their respective annual average indices. Further, in cases where there was a base change during a financial year, the annual average index is compiled by extending the series backwards using the official linking factor.

Table 43

- (i) Following the announcement in the Union Budget for 1992-93, it was decided to discontinue the practice of appropriating amounts from the Reserve Bank of India for advancing loans to industrial and agricultural financial institutions, before transferring the surplus profits of the Reserve Bank to the Government of India. Therefore, no allocation was made to IDBI, EXIM Bank, IIBI, and SIDBI out of NIC (LTO) Fund and to NHB out of NHC (LTO) Fund in 1992-93. Thereafter, the Reserve Bank has been making only token contributions to these funds. It was decided in 1997-98 to transfer the unutilised balance in the NIC (LTO) Fund, arising from repayments to Contingency Reserve on a year-to-year basis. Furthermore, loans and advances granted out of NIC (LTO) Fund by the Bank have been transferred on March 30, 2002 to the Government of India.
- (ii) Loans and advances to state governments also include temporary overdrafts to state governments. Balances held abroad include cash, short-term securities and fixed deposits.
- (iii) Data may not add up due to rounding-off.

Tables 40 to 42 & 167, 168, 172 to 175 & 226

- (i) Key monetary and liquidity measures compiled in India and their definitions are set out in the following Table.

Table: Measures of Monetary and Liquidity Aggregates

| | |
|----------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Reserve Money | = Currency in circulation + Bankers' deposits with the RBI + 'Other' deposits with the RBI = Net RBI credit to the Government* + RBI credit to the commercial sector + RBI's claims on banks + RBI's net foreign assets + Government's currency liabilities to the public – RBI's net non-monetary liabilities. |
| M1 | = Currency with the public + Demand deposits with the banking system + 'Other' deposits with the RBI. |
| M2 | = M1 + Savings deposits of post office savings banks. |
| M3 | = M1 + Time deposits with the banking system Net bank credit to the Government + Bank credit to the commercial sector + Net foreign assets of the banking sector + Government's currency liabilities to the public – Net non-monetary liabilities of the banking sector. |
| M4 | = M3 + All deposits with post office savings banks (excluding National Savings Certificates). |
| NM1 | = Currency with the public + Demand deposits with the banking system + 'Other' deposits with the RBI. |
| NM2 | = NM1 + Short-term time deposits of residents (including and up to the contractual maturity of one year). |
| NM3 | = NM2+ Long-term time deposits of residents + Call/Term funding from financial institutions. |
| L1 | = NM3 + All deposits with the post office savings banks (excluding National Savings Certificates). |
| L2 | = L1 + Term deposits with term lending institutions and refinancing institutions (FIs) + Term borrowing by FIs + Certificates of deposit issued by FIs |
| L3 | = L2 + Public deposits of non-banking financial companies. |
| Net bank credit to Government | = Net RBI credit to the Government (i.e., Net RBI credit to the Centre + Net RBI credit to the state Governments) + Other banks' credit to the Government. |
| Net RBI credit to Central Government | = Loans and advances to the Centre + Investment in Government securities/ T-bills + Rupee coins + Small coins - Centre's cash balances** with the Reserve Bank. |

| Net foreign assets of the banking sector | = RBI's net foreign assets + Other banks' foreign assets. |
| Net non-monetary liabilities of the banking sector | = RBI's net non-monetary liabilities + Net non-monetary liabilities of other banks. |

*: Following a change in accounting practice with effect from July 11, 2014, liquidity operations (repo, term repo, and MSF, net of reverse repo and term reverse repo) are now treated as loans and advances to banks and commercial sector instead of the earlier treatment of purchase/ sale of securities and therefore excluded from net RBI credit to Government.

**: Since April 2004, Centre's cash balances also include amounts mobilised under the market stabilisation scheme (MSS) which are maintained with the Reserve Bank.

- (ii) Date relate to the last Friday of each month for the period 1950-51 to 1984-85 and for subsequent period these pertain to the last reporting Friday of the month except for March wherein data relate to a) March 31 for the Reserve Bank data and b) last reporting Friday (last Friday prior to March-1985) for scheduled commercial banks data.
- (iii) Banks include commercial and co-operative banks. The coverage of co-operative banks has increased over time. As regards co-operative banks, data up to February-1970 include State co-operative banks, while that from March-1970 onwards are also inclusive of central co-operative banks and primary co-operative banks.
- (iv) The details of the compilation of the new monetary/banking aggregates are available in the Report of the Working Group on Money Supply: Analytics and Methodology of Compilation (WGMS) (Chairman: Dr.Y. V. Reddy), June 1998. The acronyms NM1, NM2 and NM3 are used to distinguish the new monetary aggregates as proposed by the WGMS from the existing monetary aggregates.
- (v) Monetary data have been revised since April-1992 in line with the new accounting standards and consistent with the methodology suggested by the WGMS. The revision is in respect of pension and provident funds with commercial banks which are classified as other demand and time liabilities and includes those banks which have reported such changes so far.
- (vi) There was a change in the treatment of apportionment of savings deposits into its two components - demand and time in March-1978. Banks were required in November-1997 to report (vide circular DBOD. No. Ref. BC. 142/09.16.001797-98 dated November 19, 1997) such classification on the basis of the position as at close of business at September 30 and March 31 instead of as at end-June and as at end-December as was done hitherto. The average of the minimum balances maintained in each of the month during the half year period shall be treated by the bank as the amount representing the 'time liability' portion of the savings bank deposits.
- (vii) Available data on demand deposits of scheduled banks for the period prior to November-1960 were inclusive of interbank deposits. Inter-bank deposits are, however, not a part of money supply. As separate data on interbank deposits were not available for the period prior to November-1960, estimates of inter-bank deposits were derived based on information available in the corresponding data on demand deposits obtained from Form XIII (see pages 1215-1220 of the RBI Bulletin, August-1962 for detailed estimation methodology). These estimates of inter-bank deposits have been deducted from demand deposits for the period up to November-1960.
- (viii) Scheduled commercial banks' time deposits take into account ₹17,945 crore on account of proceeds arising from Resurgent India Bonds (RIBs) on August 28, 1998; ₹25,662 crore on account of proceeds from India Millennium Deposits (IMDs) on November 17, 2000; the redemption of RIBs of ₹22,693 crore on October 1, 2003; and the redemption of IMDs of ₹31,959 crore on December 29, 2005.
- (ix) NM2 and NM3 are based on the residency concept and, hence, do not directly reckon non-resident foreign currency repatriable fixed deposits in the form of FCNR(B) deposits, Resurgent India Bonds (RIBs) and India Millennium Deposits (IMDs).

- (x) On the establishment of the National Bank for Agricultural and Rural Development (NABARD) on July 12, 1982, certain assets and liabilities of the Reserve Bank were transferred to NABARD, necessitating some reclassification of aggregates on the sources side of money stock since that date.
- (xi) The Reserve Bank's credit to the commercial sector represents investments in bonds/shares of financial institutions, loans to them and holdings of internal bills purchased and discounted. In case of the new monetary aggregates, the RBI's refinance to the NABARD, which was earlier part of RBI's claims on banks, has been classified as part of RBI credit to commercial sector.
- (xii) The Reserve Bank's net foreign exchange assets take into account the impact of appreciation in the value of gold following its revaluation close to international market price effective October 17, 1990. Such appreciation has a corresponding effect on Reserve Bank's net non-monetary liabilities.
- (xiii) In the new monetary aggregate NM3, capital account consists of paid-up capital and reserves. 'Other Items (net)' is the residual, balancing the components and sources of the monetary and banking accounts and includes other demand and time liabilities, net inter-bank liabilities etc. as applicable.

Data for 1950-51 are inclusive of 'money at call and short notice' and 'due from banks' but exclude 'foreign bills purchased and discounted'. The series for 1952-53 to 1953-54 includes 'due from banks' but excludes 'foreign bills purchased and discounted'. The series for 1954-55 to 1960-61 (up to October 1960) is inclusive of 'due from banks'. (For details, see the article "Major Banking Aggregates: 1950-51 to 1997-98"; RBI Bulletin, November-1998).

Tables 92, 97, 99, 104, 232 to 234

Major deficit indicators presented in these tables are defined as follows: revenue deficit denotes the difference between revenue receipts and revenue expenditure. The conventional deficit (budgetary deficit) is the difference between all receipts and expenditure, both revenue and capital. Since March 1997, conventional deficit is represented as draw down of cash balances. The gross fiscal deficit (GFD) is the excess of total expenditure (including loans net of recovery) over revenue receipts (including external grants) and non-debt capital receipts. Since 1999-2000, GFD excludes States' share in small savings as per the new system of accounting. The net fiscal deficit is the gross fiscal deficit less net lending of the Central Government. Gross primary deficit is defined as GFD minus interest payments. The net primary deficit denotes net fiscal deficit minus net interest payments. Primary revenue deficit denotes revenue deficit minus interest payments. The net RBI credit to the Central Government represents the sum of variations in the RBI's holdings of (i) Central Government dated securities, (ii) Treasury bills, (iii) Rupee coins, and (iv) loans and advances from RBI to the Centre since April 1, 1997 adjusted for changes in the Centre's cash balances with RBI in the case of Centre. Regarding State Governments, net RBI credit refers to variation in loans and advances given to them by the RBI net of their incremental deposits with the RBI, for the State Governments having accounts with the RBI. The combined deficit indicators have been worked out after netting out the inter-Governmental transactions between Centre and States. Combined GFD is the GFD of Central Government plus GFD of State Governments minus net lending from Central Government to State Governments. Revenue deficit is the difference between revenue receipts and revenue expenditure of the Central and State Governments adjusted for inter-Governmental transactions in the revenue account. Combined gross primary deficit is defined as combined GFD minus combined interest payments.

Tables 93 to 95 & 232

The accounting classification of the Central Budget has undergone two major changes since 1970-71, once in 1974-75 and again in 1987-88. Besides, there have been regrouping and reclassification of certain receipts and expenditure items between revenue and capital accounts. These regrouping/reclassifications were in the nature of (i) external grants, which were treated as capital receipts prior

to 1991-92, have been reclassified under revenue receipts since then; (ii) prior to 1982-83, capital expenditure was inclusive of discharge of debt (both internal and external debt) and since then, capital expenditures have been shown net of discharge of debt; (iii) beginning 1987-88, the budgetary classification has been changed by regrouping the expenditures into plan and non-plan heads from the classification of developmental and non-developmental heads followed then; (iv) receipts under small savings were shown net of loans to States and UTs against their collections, prior to 1990-91. The 1991-92 Central Government Budget published the back data up to 1982-83 incorporating the above regrouping/reclassification. Data presented in the Handbook for the period prior to 1982-83 have also been adjusted for these changes to the extent possible to build a consistent and comparable time-series data, while retaining the deficit figures unaltered as given in the Budget documents. Accordingly, the receipts and expenditure figures of the Central Government given in these tables will not tally with the figures published in the respective Budget documents prior to 1991-92.

Table 94

In the Union Budget 1999-2000, a National Small Savings Fund (NSSF) has been created in the Public Account of India and all collections/ disbursements under small savings certificates, deposits and public provident fund are made into/out of this Fund. Under the new accounting system, investments from the Fund are being made in Central and State Government securities as per the norms decided from time to time by the Government of India. Therefore, the figures for small savings since 1999-2000 relate to Centre's share in small savings and prior to this period, the figures represent total small saving collections. For the period 2002-03 to 2006-07 the entire net collections under the small saving schemes were transferred to States/Union Territories.

Table 96

The expenditure figures given in the table differ from the data given in the Expenditure Budget of the Central Government on account of inclusion of the gross transactions of commercial departments in the revenue account. Regarding classification of budgetary figures into developmental and non-developmental, data from 1974-75 onwards cover expenditure on food subsidy under the head 'agriculture and allied services' under developmental expenditure; in earlier years, data on the expenditure on these items were included under the head 'other expenditure' as part of non-developmental expenditure. The expenditure figures for the years 1986-87 to 1998-99 have been revised in the later Budgets. As the component-wise details are not available, these revisions have been effected only in the totals. Hence, the individual components of developmental and non-developmental heads will not add up to totals for these years.

Tables 99 to 103, 111 & 233

Data relates to all the State Governments, including the erstwhile state of Jammu and Kashmir. Data from 2017-18 onwards pertains to all the states and UTs with legislatures.

Table 100

In terms of the change in the constitutional provision for sharing Central taxes between the Centre and the States, all taxes and duties (except surcharge on taxes and duties and any cess for specific purpose) are distributed between the Union and the States from the year 2000-01 as against the earlier provision for sharing of income tax and union excise duty. As full details of State's share in the Central taxes are not uniformly available in the State Budgets for the period 2000-01 to 2005-06, only aggregate position of the States' share in Central taxes has been presented.

Tables 104, 105 & 107

Figures for Centre and States do not add up to the combined position due to inter-Government adjustments. The data relating to combined receipts and expenditure of Central Government and State Governments are shown net of inter-Governmental transactions. The adjustments are thus:(i) revenue receipts of the States and revenue expenditure of the Centre are adjusted for grants from the Centre to the States,(ii) revenue expenditure of the States and revenue receipts of the Centre are net of interest payments to the Centre by the States, (iii) capital receipts of the States and capital disbursements of the Centre are adjusted for loans from the Centre to States, and (iv) capital disbursements of the States and capital receipts of the Centre are net of repayments of loans by the States to the Centre, (v) the tax revenue for 2000-01 onward is net of amount transferred to National Calamity Contingency Fund(NCCF).

Table 106

Centre's gross tax revenue excludes assignments of Union Territories taxes to local bodies up to 1993-94.

Table 107

Regarding Centre, the expenditure data for the years 1986-87 to 1988-89 have been revised in the later budgets. As the component-wise details are not available; these revisions have been effected in the totals. Hence, the individual components of developmental and non-developmental heads will not add up to totals for these years.

Table 110

With the creation of National Small Savings Fund (NSSF) in April-1999, the outstanding balances under small savings amounting to ₹180273 crore were converted into Central Government special securities which formed part of internal debt. Internal debt also includes liabilities on account of Market Stabilisation Scheme (MSS). All investments by NSSF in Central Government's special securities form part of internal debt since 1999-2000.The sharp increase in internal debt and corresponding decline in small savings and provident funds in 1999-2000 is due to this accounting change.

Table 111

Tables 127 to 129

The index number of foreign trade of a country serves as an instrument to indicate the temporal fluctuations in the export/import of the country in terms of volume and unit price. An index number, in general, may be defined as a measure of average change in a group of related variables over two different situations. The index numbers of foreign trade have been computed as:

(i) *Unit value index*

The unit value index (UVI) is compiled on the basis of Laspeyre's (Base: 2012-13) formula:

$$I_{jmt} = \frac{\sum_{i=1}^{n_{jmt}} \left(\frac{P_{ijmt}}{P_{ijmb}} \right) w_{ijmb}}{\sum_{i=1}^{n_{jmt}} w_{ijmb}}$$

where,

$$w_{ijmb} = \frac{v_{ijmb}}{\sum_{i=1}^{n_{jmb}} v_{ijmb}}$$

P_{ijmt} = Unit value of an item i in group j, month m and year t

P_{ijmb} = Unit value of an item i in group j, month m in base year b

v_{ijmb} = Total (export / import) value of an item i in group j, month m in base year b

n_{jmt} = Total number of items in group j, month m and year t

n_{jmb} = Total number of items in group j, month m and base year b

The yearly indices are based on weighted average of monthly indices. Reference to DGCI&S may be taken for further details (http://www.dgciskol.gov.in/TradeIndices_side_new.aspx).

(ii) *Quantum index*

Laspeyre's (Base: 2012-13) formula is used for the construction of quantum index (QI):

$$q_{jmt} = \frac{v_{jmt}}{I_{jmt}}$$

where

$$v_{jmt} = \frac{\sum_{i=1}^{n_{jmt}} v_{ijmt}}{\sum_{i=1}^{n_{jmb}} v_{ijmb}}$$

v_{ijmt} = Total (export / import) value of an item i in group j, month m in year t

(iii) *Terms of trade*

The three types of terms of trade are calculated as:

(a) Gross terms of trade (GTT) is the ratio of quantum index (QI) of imports to that of exports.

$$GTT = \frac{QI (\text{Imports})}{QI (\text{Exports})} \times 100$$

(b) Net terms of trade (NTT) is the ratio of unit value index (UVI) of exports to that of imports

$$NTT = \frac{UVI (\text{Exports})}{UVI (\text{Imports})} \times 100$$

(c) Income terms of trade (ITT) is the product of net terms of trade (NTT) and quantum index (QI) of exports

$$\begin{aligned} \text{ITT} &= \frac{\text{NTT}}{100} \times \text{QI (Exports)} \\ &= \frac{\text{UVI (Exports)} \times \text{QI (Exports)}}{\text{UVI (Imports)}} \end{aligned}$$
